

HRGAC Field Course Rules and Contests

General:

- Weeks 1 -3 will use the Field Targets 4 arrows/target (scores: black center 5, white 4 ring, black 3 ring)
- Weeks 4-5 will use the Animal Targets (scores: X as additional point, vital, and non vitals)-
 - must shoot 3 scores during this 2 week period
 - Scoring will be as follows:
 - 1st arrow: X=21pts, vital = 20pts, non vital = 18pts (if arrow didn't score – shoot arrow 2)
 - shoot 2nd arrow from next stake: X=17pts, vital = 16pts, non vital = 14pts
 - (if a miss) shoot 3rd arrow from next stake: X=13pts, vital = 12pts, non vital = 10pts
 - **Shoot only 1 scoring arrow per target face** (if all first arrows score, only 14 arrows will be shot in the round)
- Weeks 6-8 will use the Hunter Targets (scores: white 5 spot, black 4 and 3 ring)
 - 4 arrows/target * 14 targets = 56 arrows/round
 - Targets will have either 1 stake (4 arrows/stake), 2 stakes (2 arrows/stake), or 4 stakes (1 arrow/stake)
- Separate stakes will be used for weeks 1-4, 5-8, & 9-12. All stakes are between 20ft – 70 yds.
- An arrow that is crossing/breaking/touching a ring will result in the higher score being recorded
- **Scratch** Score Maximum is 280pts (294pts possible in the Animal round)
- **Weekly scores MUST be recorded in the League Binder.**
- **Shooting ahead is encouraged when possible. Makeup scores should not lag by more than 1 week. Be aware that the targets will only be up for 4 weeks.**
- **All targets (practice & field) are set with one rangefinder. Shoot from designated stake, regardless of your personal range finder.**

Handicaps:

- Members will have their handicap calculated when 2 rounds have been completed.
- Handicap calculation will be as follows:
 - $(280 - \text{Average score}) * 0.85 = \text{Handicap}$.
 - “Average score” is based on the average of your previous two scores entered
 - Weeks 1 and 2 handicap will be based on scores from those two weeks
 - Weekly Scratch score + Handicap = Weekly handicap score. **Handicapped max score is 280 (294 for Animal round).** (Ex. Scratch score of 250 + a handicap of 35 will result in a handicapped score of 280)
 - Separate handicaps will be calculated for each target face (field, animal, hunter)
